For GMP Oligos or Large Scale Synthesis, please contact our customer support or use the request form at [eurofinsgenomics.com](http://eurofinsgenomics.com)

<sup>1</sup> Typical yield and purity applies to a 20mer; Calculation: 1 OD = 5 nmol = 30 µg; may vary for individual dyes, sequences with GC content > 70%, > 3 purine stretches, or strong secondary structures.

<sup>2</sup> The synthesis scale indicates the initial amount of 3' bases.

<sup>3</sup> Length restriction for some 3' modified oligos is 5 - 50 bases; please inquire.

<sup>4</sup> For some internal modifications where an additional Amino-C6-dT linker is used, additional 300 NOK are charged.

<sup>6</sup> Purity is based on CGE analysis.

<sup>7</sup> Modified RNA, siRNA, O-Methyl-RNA and Chimerics requires HPLC purification;

<sup>8</sup> There is no OD guarantee for oligos < 18 and > 35 bases or for oligos with more than one modification (except qPCR Probes)

<sup>9</sup> One 96well plate must contain at least 20 oligos
